ON SHIPMENT NOW!

ACTIVE COAXIAL DESIGN STAGE MONITORS

Starting from March 2016 LVX tour series is enriched

by LVX XM professional stage monitors. Available in two models, respectively equipped

with a 12" and a 15" woofer, LVX XM12 and LVX XM15 feature premium components and a unique coaxial horn design, delivering a powerful yet clear sound quality in spite of their compact design and raising the bar for intelligibility, definition and ease of use.

ADAPTABLE TO ALL STAGE REQUIREMENTS

LVX XM monitors feature an advanced DSP offering eight variable presets in order to easily adapt to different stage requirements. The cabinets are constructed in sturdy plywood and comes with 2 integrated side handles allowing easy transport and stage set up operations. A pole mount cup on one side allow to put the system on a pole for vertical use.

A NEW HORN DESIGN

LVX XM's design enhance the benefits of coaxial horn wedge's concept. dBTechnologies designed a horn that not only shape high frequencies' directivity, but also acts as a phase plug for the woofer, boosting and lighting up the vocal band, thanks also to the advanced DSP featuring FIR filters

processing. As a result, not only the horn contributes to deliver a bright audio performance with a uniform throw pattern, but it also reduces the overall dimensions of the system and protects the internal components, reinforcing the cabinet structure.
